Joe Turco

- **CEO & President of Optimum Data Incorporated**
 - 5066 South 111th Street, Omaha, NE 68137

INTERESTS

Chemistry

- **Selected College Major**
 - I was introduced to the very basics of Chemistry by my junior high School teacher, Sarah Morrison, at that time was typically much earlier than other students in my school district. Having that interest planted within me it finally flourished in my latter years of high school as I challenged the IB Diploma Program. It was in IB Chemistry HL II that I found passion for this subject whilst learning rudimentary Medicinal & Organic Chemistry.

Computer Science

- **Favoured Pastime & Optional Work**
 - I have always been interested in Website Development. My first introduction to Website Development was the slight real-time modifications I would make to websites using Google's Inspect Element Tool. From there I learned more of the languages from school and online sources that eventually branched to CSS, JS, and jQuery.

Anaesthesiology

- **Desired Field of Study**
 - Medicinal & Organic Chemistry combined with my endless desire to help those in need has led me to this occupational line of study.
